

GIT ASSIGNMENT 1

1. Create a New Repository.

- git init

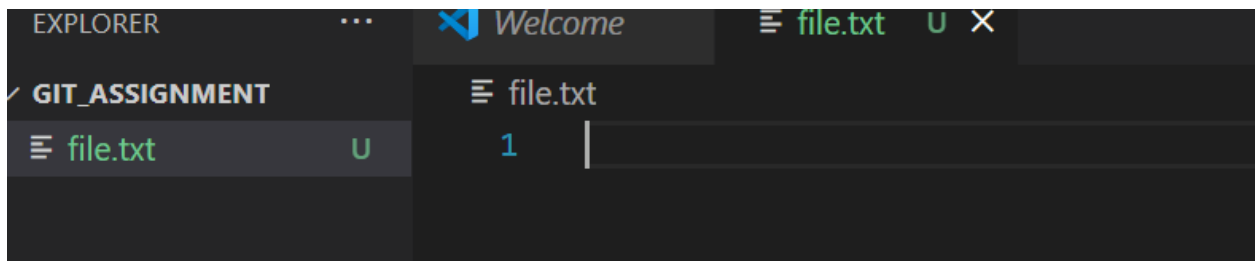

```
PS C:\Users\hp\Dropbox\My PC (LAPTOP-GQ1783RA)\Desktop\git_assignment> git init
Initialized empty Git repository in C:/Users/hp/Dropbox/My PC (LAPTOP-GQ1783RA)/Desktop/git_assignment/.git/
PS C:\Users\hp\Dropbox\My PC (LAPTOP-GQ1783RA)\Desktop\git_assignment>
```

- git remote add origin https://github.com/adarsh-codes/git_assignment

```
PS C:\Users\hp\Dropbox\My PC (LAPTOP-GQ1783RA)\Desktop\git_assignment> git remote add origin https://github.com/adarsh-codes/g
it_assignment_
PS C:\Users\hp\Dropbox\My PC (LAPTOP-GQ1783RA)\Desktop\git_assignment>
```

2. Create a New File

- Created file.txt

3. Create a Branch

- **git branch -M master**

```
PS C:\Users\hp\Dropbox\My PC (LAPTOP-GQ1783RA)\Desktop\git_assignment> git branch -M master
```

4. Make Changes in the New Branch

- Made changes in the master file.txt file.
- git add .
- git commit -m "master"
- git push -u origin master

```
PS C:\Users\hp\Dropbox\My PC (LAPTOP-GQ1783RA)\Desktop\git_assignment> git add .
PS C:\Users\hp\Dropbox\My PC (LAPTOP-GQ1783RA)\Desktop\git_assignment> git commit -m "master"
[master (root-commit) dbbe04c] master
1 file changed, 0 insertions(+), 0 deletions(-)
create mode 100644 file.txt
PS C:\Users\hp\Dropbox\My PC (LAPTOP-GQ1783RA)\Desktop\git_assignment> git push -u origin master
Enumerating objects: 3, done.
Counting objects: 100% (3/3), done.
Writing objects: 100% (3/3), 206 bytes | 206.00 KiB/s, done.
```

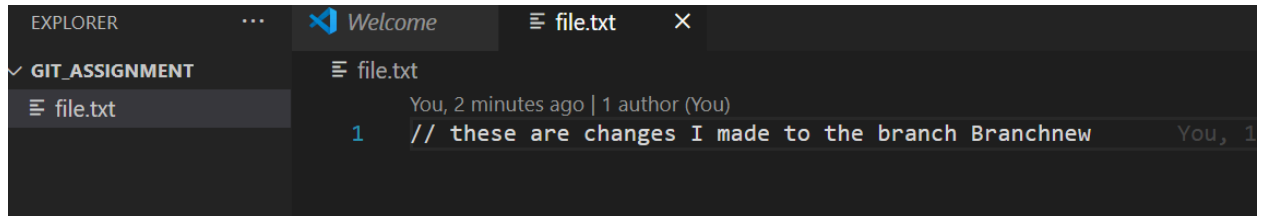

5. Create Another Branch (Optional)

- Created another branch named Branchnew

```
PS C:\Users\hp\Dropbox\My PC (LAPTOP-GQ1783RA)\Desktop\git_assignment> git branch
* master
PS C:\Users\hp\Dropbox\My PC (LAPTOP-GQ1783RA)\Desktop\git_assignment> git branch Branchnew
PS C:\Users\hp\Dropbox\My PC (LAPTOP-GQ1783RA)\Desktop\git_assignment> git branch
Branchnew
* master
PS C:\Users\hp\Dropbox\My PC (LAPTOP-GQ1783RA)\Desktop\git_assignment>
```

- git checkout Branchnew (switch to the branch Branchnew)

```
PS C:\Users\hp\Dropbox\My PC (LAPTOP-GQ1783RA)\Desktop\git_assignment> git checkout Branchnew
Switched to branch 'Branchnew'
PS C:\Users\hp\Dropbox\My PC (LAPTOP-GQ1783RA)\Desktop\git_assignment> git branch
* Branchnew
  master
PS C:\Users\hp\Dropbox\My PC (LAPTOP-GQ1783RA)\Desktop\git_assignment>
```

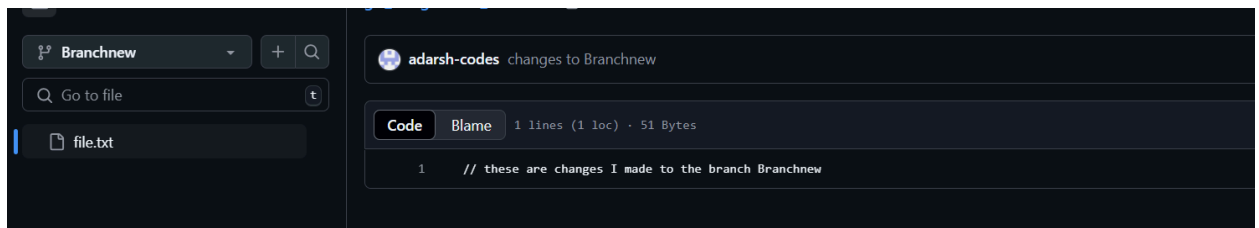

- Made changes to the branch Branchnew which is only visible to the Branchnew

```
PS C:\Users\hp\Dropbox\My PC (LAPTOP-GQ1783RA)\Desktop\git_assignment> git add .
PS C:\Users\hp\Dropbox\My PC (LAPTOP-GQ1783RA)\Desktop\git_assignment> git commit -m "changes to Branchnew"
[Branchnew 553b8ae] changes to Branchnew
1 file changed, 1 insertion(+)
PS C:\Users\hp\Dropbox\My PC (LAPTOP-GQ1783RA)\Desktop\git_assignment> git push origin Branchnew
Enumerating objects: 5, done.
Counting objects: 100% (5/5), done.
Delta compression using up to 8 threads
```

- master branch file.txt looks like this

- Branchnew branch file.txt looks like this now

6. Merge Branches

- **git checkout master (back to the master branch)**

```
PS C:\Users\hp\Dropbox\My PC (LAPTOP-GQ1783RA)\Desktop\git_assignment> git checkout master
Switched to branch 'master'
Your branch is up to date with 'origin/master'.
PS C:\Users\hp\Dropbox\My PC (LAPTOP-GQ1783RA)\Desktop\git_assignment>
```

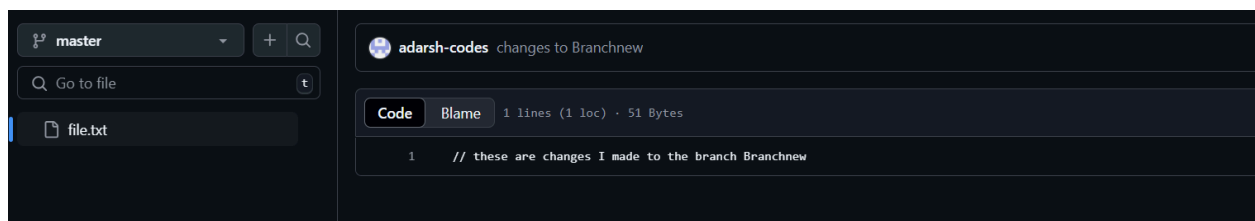

- **git merge Branchnew**

```
PS C:\Users\hp\Dropbox\My PC (LAPTOP-GQ1783RA)\Desktop\git_assignment> git merge Branchnew
Updating dbbe04c..553b8ae
Fast-forward
 file.txt | 1 +
 1 file changed, 1 insertion(+)
```

- **git push origin master**

```
PS C:\Users\hp\Dropbox\My PC (LAPTOP-GQ1783RA)\Desktop\git_assignment> git push origin master
Total 0 (delta 0), reused 0 (delta 0), pack-reused 0 (from 0)
To https://github.com/adarsh-codes/git_assignment_
 dbbe04c..553b8ae master -> master
```

Now to the master branch we merged the Branchnew branch and now the file changed merge will be visible in the master branch as well.

7. Pull Changes from Remote

- git pull origin master

```
dbbe04c..553b8ae master -> master
● PS C:\Users\hp\Dropbox\My PC (LAPTOP-GQ1783RA)\Desktop\git_assignment> git pull origin master
  From https://github.com/adarsh-codes/git_assignment_
   * branch      master      -> FETCH_HEAD
   Already up to date.
○ PS C:\Users\hp\Dropbox\My PC (LAPTOP-GQ1783RA)\Desktop\git_assignment>
```

8. View Git Log and History

- git log

```
○ PS C:\Users\hp\Dropbox\My PC (LAPTOP-GQ1783RA)\Desktop\git_assignment> git log
commit 553b8aecb9b96c40df7b4a0e7be49f66c7cbee9b (HEAD -> master, origin/master, origin/Branchnew, Branchnew)
Author: adarsh <adarshksingh14@gmail.com>
Date: Thu Mar 6 16:14:08 2025 +0530

    changes to Branchnew

commit dbbe04c47cc7e5d1e47fa90d5ea9f9292829704c
Author: adarsh <adarshksingh14@gmail.com>
```

9. Git Status and Staging

● git status

```
● PS C:\Users\hp\Dropbox\My PC (LAPTOP-GQ1783RA)\Desktop\git_assignment> git status
On branch master
Your branch is up to date with 'origin/master'.

nothing to commit, working tree clean
○ PS C:\Users\hp\Dropbox\My PC (LAPTOP-GQ1783RA)\Desktop\git_assignment>
```

- **git add .**

```
nothing to commit, working tree clean
PS C:\Users\hp\Dropbox\My PC (LAPTOP-GQ1783RA)\Desktop\git_assignment> git add .
PS C:\Users\hp\Dropbox\My PC (LAPTOP-GQ1783RA)\Desktop\git_assignment> █
```

- **git commit -m “commit-check”**

```
PS C:\Users\hp\Dropbox\My PC (LAPTOP-GQ1783RA)\Desktop\git_assignment> git commit -m "commit-check"
On branch master
Your branch is up to date with 'origin/master'.

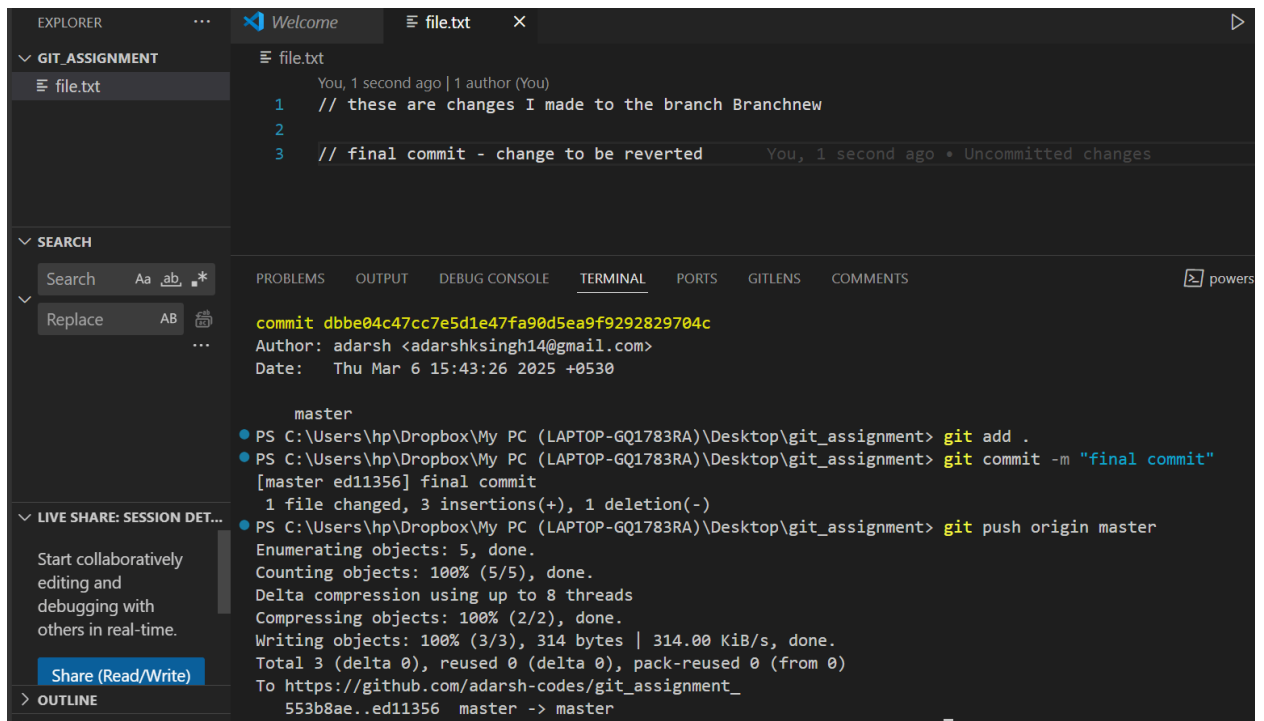

nothing to commit, working tree clean
PS C:\Users\hp\Dropbox\My PC (LAPTOP-GQ1783RA)\Desktop\git_assignment> █
```

- **git push -u origin master**

```
PS C:\Users\hp\Dropbox\My PC (LAPTOP-GQ1783RA)\Desktop\git_assignment> git push -u origin master
branch 'master' set up to track 'origin/master'.
Everything up-to-date
PS C:\Users\hp\Dropbox\My PC (LAPTOP-GQ1783RA)\Desktop\git_assignment> █
```

10. Revert and Reset

- Made changes to the file.txt
 - git add .
 - git commit -m "final commit"
 - git push origin master

The screenshot shows the Visual Studio Code interface. On the left, the Explorer pane shows a file named 'file.txt' under a 'GIT_ASSIGNMENT' folder. The file content is as follows:

```
file.txt
You, 1 second ago | 1 author (You)
1 // these are changes I made to the branch Branchnew
2
3 // final commit - change to be reverted
```

Below the file content, the Search pane is visible. The main area shows the Terminal pane with the following output:

```
commit dbbe04c47cc7e5d1e47fa90d5ea9f9292829704c
Author: adarsh <adarshksingh14@gmail.com>
Date: Thu Mar 6 15:43:26 2025 +0530

master
PS C:\Users\hp\Dropbox\My PC (LAPTOP-GQ1783RA)\Desktop\git_assignment> git add .
PS C:\Users\hp\Dropbox\My PC (LAPTOP-GQ1783RA)\Desktop\git_assignment> git commit -m "final commit"
[master ed11356] final commit
1 file changed, 3 insertions(+), 1 deletion(-)
PS C:\Users\hp\Dropbox\My PC (LAPTOP-GQ1783RA)\Desktop\git_assignment> git push origin master
Enumerating objects: 5, done.
Counting objects: 100% (5/5), done.
Delta compression using up to 8 threads
Compressing objects: 100% (2/2), done.
Writing objects: 100% (3/3), 314 bytes | 314.00 KiB/s, done.

GIT REMOTE REPOSITORY

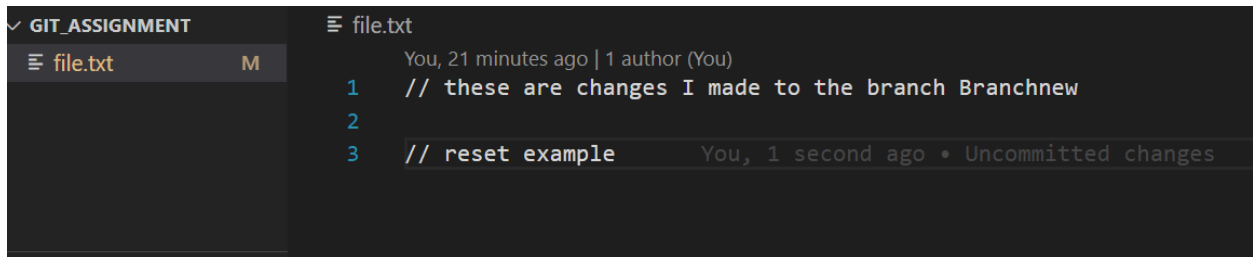

The screenshot shows the GitHub interface for a repository named 'git_assignment_' owned by 'adarsh-codes'. The repository is public. The main navigation bar includes links for Code, Issues, Pull requests, Actions, Projects, Wiki, Security, Insights, and Settings. Below the repository name, there are buttons for 'Pin' and 'Unwatch' (with a count of 1). The repository has 2 branches (with 'master' selected) and 0 tags. A search bar 'Go to file' is present. There are two main action buttons: 'Add file' and 'Code'. The commit history shows a recent commit by 'adarsh-codes' titled 'final commit reverted' with hash 'c4c4f49' from 7 minutes ago. Below this, a file named 'file.txt' is listed with the same commit message and time.

RESET -

Reset is used in cases where we need to change the history of commits also. While revert was used just to revert a commit and make a new commit of it.

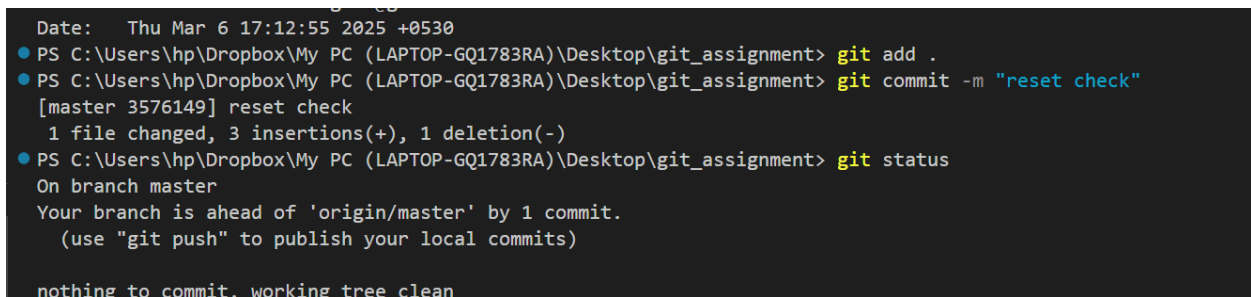

We use reset when we need to reset the local commits before pushing it into the remote repository. No extra commit is created in the git log.

- Making some change in the files.
- // reset example is new change

```
✓ GIT_ASSIGNMENT
file.txt M
You, 21 minutes ago | 1 author (You)
1 // these are changes I made to the branch Branchnew
2
3 // reset example You, 1 second ago • Uncommitted changes
```

- git add .
- git commit -m "reset check"
- git status

```
Date: Thu Mar 6 17:12:55 2025 +0530
PS C:\Users\hp\Dropbox\My PC (LAPTOP-GQ1783RA)\Desktop\git_assignment> git add .
PS C:\Users\hp\Dropbox\My PC (LAPTOP-GQ1783RA)\Desktop\git_assignment> git commit -m "reset check"
[master 3576149] reset check
1 file changed, 3 insertions(+), 1 deletion(-)
PS C:\Users\hp\Dropbox\My PC (LAPTOP-GQ1783RA)\Desktop\git_assignment> git status
On branch master
Your branch is ahead of 'origin/master' by 1 commit.
(use "git push" to publish your local commits)

nothing to commit, working tree clean
```

NOW RESET THE LATEST COMMIT (HEAD~1)

- **git reset --soft HEAD~1**
- **git status**

```
nothing to commit, working tree clean
PS C:\Users\hp\Dropbox\My PC (LAPTOP-GQ1783RA)\Desktop\git_assignment> git reset --soft HEAD~1
PS C:\Users\hp\Dropbox\My PC (LAPTOP-GQ1783RA)\Desktop\git_assignment> git status
On branch master
Your branch is up to date with 'origin/master'.

Changes to be committed:
  (use "git restore --staged <file>..." to unstage)
        modified:   file.txt
```

After un-committing the file goes into staged area again. This is what soft reset does.

TO MAKE THE CHANGES RESET COMMIT AND UNSTAGED, WE CAN USE MIXED RESET

- **git reset --mixed HEAD~1**
- **git status**

```
PS C:\Users\hp\Dropbox\My PC (LAPTOP-GQ1783RA)\Desktop\git_assignment> git reset --mixed HEAD~1
Unstaged changes after reset:
M       file.txt
PS C:\Users\hp\Dropbox\My PC (LAPTOP-GQ1783RA)\Desktop\git_assignment> git status
On branch master
Your branch is behind 'origin/master' by 1 commit, and can be fast-forwarded.
  (use "git pull" to update your local branch)

Changes not staged for commit:
  (use "git add <file>..." to update what will be committed)
  (use "git restore <file>..." to discard changes in working directory)
        modified:   file.txt
```

The changes have been unstaged now.

TO COMPLETELY REMOVE THE HISTORY OF COMMITS, WE USE HARD RESET -

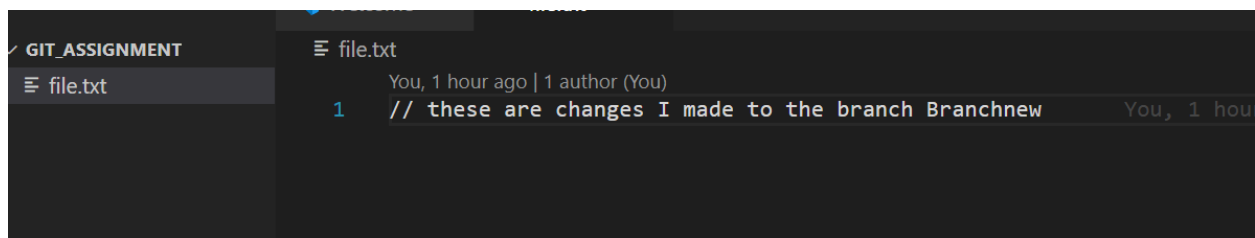

- **git reset --hard HEAD~1**
- **git status**

```
no changes added to commit (use "git add" and/or "git commit -a")
PS C:\Users\hp\Dropbox\My PC (LAPTOP-GQ1783RA)\Desktop\git_assignment> git reset --hard HEAD~1
HEAD is now at c4c4f49 final commit reverted
PS C:\Users\hp\Dropbox\My PC (LAPTOP-GQ1783RA)\Desktop\git_assignment> git status
On branch master
Your branch is behind 'origin/master' by 2 commits, and can be fast-forwarded.
(use "git pull" to update your local branch)

nothing to commit, working tree clean
PS C:\Users\hp\Dropbox\My PC (LAPTOP-GQ1783RA)\Desktop\git_assignment>
```

USING HARD RESET, WE GO BACK TO THE COMMIT BEFORE THE ONE WE HAVE TILL HARD RESET.

AFTER HARD RESET, OUR FILE LOOKS LIKE BEFORE THIS COMMIT - ALL CHANGES UNDONE.

-----X-----
